PROFESSIONAL SUMMARY

Second-year Cyber Security student at NPR College of Engineering and Technology, passionate about offensive security and aspiring to become an ethical hacker. Project work spans biometric transaction security, AI-based phishing and deepfake detection, drone signal protection and Bluetooth firewalling. Strong in Python and C/C++, with a collaborative, adaptable and problem-solving approach.

EDUCATION

Bachelor of Engineering - Cyber Security	2025 - 2029
NPR College of Engineering and Technology, Madurai (currently pursuing)	
Higher Secondary Certificate (HSC)	2023 - 2025
Setupati Higher Secondary School	
Secondary School Leaving Certificate (SSLC)	2022 - 2023
Setupati Higher Secondary School	

PROJECTS

Iris Scanner for Secure Money Transfers	Cybersecurity
• Uses iris scanning to verify identity and make money transfers safer. Keywords: iris recognition, biometrics, transaction security.	
AI in Cybersecurity	Artificial Intelligence
• Uses AI to detect phishing emails and identify deepfake voices. Keywords: phishing detection, deepfake audio.	
Signal Guard	Drone Security
• Aims to protect the radio-frequency signals between a drone and its controller. Keywords: RF signals, controller security.	
Bluetooth Firewall System	Network Security
• Detects and blocks unauthorized Bluetooth connections using real-time monitoring and authentication techniques.	
Agro-Based Farmer-Customer Application	Application Development
• Enables direct farmer-to-consumer sales with real-time ordering and smart features including price prediction.	
GeoSense	Road Safety
• Guides drivers toward safer journeys by accounting for conditions such as rain and heavy traffic. Keywords: geolocation, weather, traffic.	
Autonomous Delivery Truck	Autonomous Systems
• Autonomous truck concept for delivering packages and goods over long distances by road. Keywords: autonomous driving, logistics.	

SKILLS

Programming	Python, C/C++, HTML
Security	Network Security, Firewall Management, Bluetooth Security, Biometrics, Phishing and Deepfake Detection
Professional	Problem Solving, Team Collaboration, Adaptability, Critical Thinking, Presentation Skills
Languages	English, Tamil
